F: (858) 654-0103

Wesley S. Dymek, Principal  
Rosemary Dymek, Principal

This year's annual golf tournament was held at the Twin Oaks Country Club, on Friday, April 27, 2018. Twin Oaks Country Club is an 18-hole championship course and is a demanding, but fair test for golfers of all levels. The unique course includes three signature water features and plays adjacent to a protected wildlife habitat, adding to an experience that is both challenging and picturesque. This year's theme was **"Eighteen Shades of Green"**, and as you can see, many rocked those provocative patterned prints and slim fit chinos! Following the tournament, all guests were able to slow down the pace and relax at a delicious dinner and finally a raffle with amazing prizes. The annual

event is an excellent chance for members, new and old, to connect and enjoy a day on the greens. On behalf of Paragon Services Engineering, we would like to thank the BOMA San Diego committee for putting on a great event!

## A Job Well Done

It is always a pleasure to receive an email that validates the dedication and professionalism of our Paragon Team Members. It is through the efforts of the Paragon Team that enables us to be the Premier Engineering Services provider in California. You embody the Paragon Services Engineering philosophy, "Driven by Our Commitment to Service". Thank you and keep up the good work!

Paragon Services Engineering received an email from Antonio Castaneda from CBRE praising Antonio Luna for a job well done....

*"I can say many great things about engineer Antonio Luna. His dedication and commitment to both our asset and tenant is unmatched. He has gone above and beyond on many occasions with his work and time—and we are extremely grateful to him. He has made many projects possible and even takes on a few himself. His work ethic, customer service, and diligence are outstanding. In summary, our tenant is as happy as ever with Mr. Luna, and so are we."*

Paragon Services Engineering would also like to thank Antonio Castaneda for bringing to our attention the exemplary manner in which Antonio Luna is representing Paragon Services Engineering. We strive to provide excellent service to our clients and it is rewarding to hear from them that we are succeeding.

We should all take note that when we provide the dedication to service that goes above and beyond expectations, our clients do express their appreciation. Antonio's level of service is what propels us forward in our careers and in our relationships with our customers.

# 450 B Street

Chief Engineer, Tom Phillips and Building Engineer, Carlos Tapia are the Paragon Services Engineering Team at Bollert LeBeau's 450 B Street property. 450 B Street is a 20 Story, 280,621sqft. Class A Office Building in San Diego which was built in 1984 (34 years old). The dedication and attention to detail that Tom and Carlos bring to the property is evident in the following before and after photos of some of their mechanical rooms. When BBL Commercial Real Estate, which later became Bollert/LeBeau, purchased the building the mechanical areas shops and store rooms were in extremely

poor condition. Tom has been on site with Paragon since the property was purchased and has taken full ownership of the property transforming the mechanical areas, and improving building efficiency through multiple lighting and plumbing upgrades, and mentoring a number of engineers who have moved on to their own buildings. Carlos is an excellent addition to the Paragon Team at 450 B as he embodies the same sense of ownership to the property and passion to operate and maintain the property to its original design specifications in a class A manner.

Congratulations  
Tom and Carlos for a job well done.  
Keep up the good work!
